Global and APEC Privacy Recognition for Processors (PRP)

Service information sheet. Cybersecurity, IT and Data Protection. Information checked 11 October 2026.

In brief

The Global and APEC Privacy Recognition for Processors (PRP) certifies that a service provider processing personal data for clients has the security safeguards and accountability to protect it. IMDA certifies Singapore processors after an assessment by an appointed body. ICFC prepares you and trains your team.

What it is

PRP lets data processors show controllers that they can meet privacy obligations on their behalf, with a focus on security safeguards and accountability. Singapore processors are certified by IMDA after an appointed body's assessment.

Who it is for

Outsourcing, IT, cloud, payroll and other service providers that process personal data for clients.

How ICFC helps

Service	What we offer
Audit	Third-party assessments: Certification is awarded under the scheme run by IMDA as Singapore's recognised Accountability Agent. Where appointed, our auditors carry out assessments on behalf of the certification body; the certificate or mark is never issued by ICFC. Second-party audits: Supplier and partner checks against the scheme requirements, on behalf of your organisation. Readiness and internal audits: A pre-assessment that shows exactly what the formal assessment will look for, with a prioritised action list.
Consulting	Funding: We explain which scheme, if any, applies and what it requires before you commit. Non-grant: A fixed-scope engagement: gap assessment, documentation, implementation coaching, internal audit and management review, and support through the formal audit or assessment. How we work: Practical, proportionate systems that your staff can run after we leave.
Training	Classroom: Public and in-house classroom courses on PRP: awareness, implementation and internal auditor levels. Online LMS: Self-paced and live-online courses on the ICFC Digital LMS, with progress tracking and certificates of completion. Funding: Funding depends on each course's approval status, shown on the course page in the LMS.

Funding

IMDA scheme, check funding. IMDA indicates that funding support may be available for part of the consultancy and certification costs. Check the IMDA information kit and Enterprise Singapore before you apply.

Impartiality

Impartiality comes first. Every engagement begins with a conflict-of-interest check. We keep consulting and auditing roles separate, and our auditors never audit, on behalf of a certification body, an organisation that ICFC has consulted on the same scope within the period set by that body.

Frequently asked questions

Q. Who needs PRP?
A. Processors whose clients want assurance that their data is handled to a recognised international standard.

Q. Can we hold both CBPR and PRP?
A. Yes, if you act as a controller for some data and a processor for other data.

Q. What does the assessment focus on?
A. Security safeguards and accountability, checked against the PRP programme requirements.

Q. How does PRP compare with ISO/IEC 27701?
A. Both cover processor obligations. PRP is a privacy recognition scheme; ISO/IEC 27701 is a certifiable privacy management system.
