ISO 14001 Environmental Management System (EMS)

Service information sheet. ISO Management Systems. Information checked 11 October 2026.

In brief

ISO 14001 is the international standard for environmental management systems (EMS). It helps organisations manage environmental impacts, meet legal obligations and improve performance. Certification is by accredited bodies, and it is listed under EDGE Sustainability Standards.

What it is

ISO 14001 sets requirements for an environmental management system that controls environmental aspects, meets compliance obligations and improves performance.

Who it is for

Manufacturers, logistics, construction and any organisation with environmental impacts or customers asking for environmental credentials.

How ICFC helps

Service	What we offer
Audit	Third-party audits: Third-party certification audits for ISO 14001 are delivered by our auditors on behalf of accredited certification bodies. The certificate is issued by the certification body, not by ICFC. Second-party audits: Supplier and partner audits against ISO 14001 on behalf of your organisation, with clear findings you can act on. Internal audits: First-party internal audits of your environmental management system by experienced auditors, combinable with other standards in one integrated audit.
Consulting	Grant-supported (EDGE): ICFC's consultancy is led by consultants certified to SS 680:2021, which Enterprise Singapore requires for consultancy support under EDGE Standards activities. The certification is held by our individual consultants, not by ICFC as a company. Our proposal names the certified consultant who will lead your project and includes the SS 680 certification details, quotation and scope that EDGE asks for. You apply on the Business Grants Portal before any work starts or any payment is made. Vendors cannot apply, pay or claim for you, the consultant named in the Letter of Offer must bill the claim invoices, and vendors cannot be changed after approval. Support is subject to Enterprise Singapore's assessment and approval. For our SS 680 certified consultants' roles, certificate numbers, issuing body and expiry dates, or a link to the issuing body's register, please email us through the contact form. Non-grant: A fixed-scope engagement: gap assessment, documentation, implementation coaching, internal audit and management review, and support through the formal audit or assessment. How we work: Practical, proportionate systems that your staff can run after we leave.
Training	Classroom: Public and in-house classroom courses on ISO 14001: awareness, implementation and internal auditor levels. Online LMS: Self-paced and live-online courses on the ICFC Digital LMS, with progress tracking and certificates of completion. Funding: Funding depends on each course's approval status, shown on the course page in the LMS.

Funding

Listed under EDGE Standards. Enterprise Singapore lists this standard under the EDGE Grant. Check the activity page on the Enterprise Singapore website for the current support level before you apply.

Impartiality

Impartiality comes first. Every engagement begins with a conflict-of-interest check. We keep consulting and auditing roles separate, and our auditors never audit, on behalf of a certification body, an organisation that ICFC has consulted on the same scope within the period set by that body.

Frequently asked questions

Q. Is ISO 14001 eligible for EDGE?

A. Enterprise Singapore lists environmental management systems under EDGE Sustainability Standards. Check the activity page for the current support level.

Q. Does ISO 14001 help with climate reporting?
A. It builds the data and controls that sustainability reports rely on, though it is not a reporting standard.

Q. Can it be combined with ISO 50001?
A. Yes. Energy is often a significant environmental aspect, so the two integrate naturally.

Q. What is an environmental aspect?
A. Any part of your activities, products or services that can affect the environment, such as waste, emissions or water use.
