ISO/IEC 27018 Protection of personal data in public clouds

Service information sheet. Cybersecurity, IT and Data Protection. Information checked 11 October 2026.

In brief

ISO/IEC 27018 is the code of practice for protecting personal data in public cloud services. It helps cloud providers acting as processors show customers how personal data is handled. It is commonly certified with an information security management system and is listed under EDGE.

What it is

ISO/IEC 27018 sets out controls for public cloud providers acting as processors of personally identifiable information (PII).

Who it is for

Public cloud and SaaS providers that process customer personal data.

How ICFC helps

Service	What we offer
Audit	Third-party audits: Third-party certification audits for ISO/IEC 27018 are delivered by our auditors on behalf of accredited certification bodies. The certificate is issued by the certification body, not by ICFC. Second-party audits: Supplier and partner audits against ISO/IEC 27018 on behalf of your organisation, with clear findings you can act on. Internal audits: First-party internal audits of your cloud privacy (pii) protection by experienced auditors, combinable with other standards in one integrated audit.
Consulting	Grant-supported (EDGE): ICFC's consultancy is led by consultants certified to SS 680:2021, which Enterprise Singapore requires for consultancy support under EDGE Standards activities. The certification is held by our individual consultants, not by ICFC as a company. Our proposal names the certified consultant who will lead your project and includes the SS 680 certification details, quotation and scope that EDGE asks for. You apply on the Business Grants Portal before any work starts or any payment is made. Vendors cannot apply, pay or claim for you, the consultant named in the Letter of Offer must bill the claim invoices, and vendors cannot be changed after approval. Support is subject to Enterprise Singapore's assessment and approval. For our SS 680 certified consultants' roles, certificate numbers, issuing body and expiry dates, or a link to the issuing body's register, please email us through the contact form. Non-grant: A fixed-scope engagement: gap assessment, documentation, implementation coaching, internal audit and management review, and support through the formal audit or assessment. How we work: Practical, proportionate systems that your staff can run after we leave.
Training	Classroom: Public and in-house classroom courses on ISO/IEC 27018: awareness, implementation and internal auditor levels. Online LMS: Self-paced and live-online courses on the ICFC Digital LMS, with progress tracking and certificates of completion. Funding: Funding depends on each course's approval status, shown on the course page in the LMS.

Funding

Listed under EDGE Standards. Enterprise Singapore lists this standard under the EDGE Grant. Check the activity page on the Enterprise Singapore website for the current support level before you apply.

Impartiality

Impartiality comes first. Every engagement begins with a conflict-of-interest check. We keep consulting and auditing roles separate, and our auditors never audit, on behalf of a certification body, an organisation that ICFC has consulted on the same scope within the period set by that body.

Frequently asked questions

Q. Who is ISO/IEC 27018 for?
A. Public cloud providers that process personal data on behalf of their customers.

Q. Is it different from ISO/IEC 27017?

A. Yes. 27017 covers cloud security in general; 27018 focuses on personal data protection in public clouds.

Q. Does EDGE cover it?
A. Enterprise Singapore lists ISO/IEC 27018 under EDGE Sector-specific Standards. Check the activity page for the support level.

Q. Does it help with PRP?
A. Yes. The processor controls overlap, so evidence can be reused.
