ISO/IEC 42001 Artificial Intelligence Management System (AIMS)

Service information sheet. Cybersecurity, IT and Data Protection. Information checked 11 October 2026.

In brief

ISO/IEC 42001 is the international management system standard for artificial intelligence (AIMS). It helps organisations govern AI responsibly through risk and impact assessment, controls and continual improvement. Certification is by accredited bodies, and it is listed under Singapore's EDGE Grant.

What it is

ISO/IEC 42001 is the first certifiable management system standard for artificial intelligence. It covers responsible development, provision and use of AI systems, including risk and impact assessment.

Who it is for

Organisations that build, deploy or rely on AI systems and need to show responsible governance to customers or regulators.

How ICFC helps

Service	What we offer
Audit	Third-party audits: Third-party certification audits for ISO/IEC 42001 are delivered by our auditors on behalf of accredited certification bodies. The certificate is issued by the certification body, not by ICFC. Second-party audits: Supplier and partner audits against ISO/IEC 42001 on behalf of your organisation, with clear findings you can act on. Internal audits: First-party internal audits of your ai management system by experienced auditors, combinable with other standards in one integrated audit.
Consulting	Grant-supported (EDGE): ICFC's consultancy is led by consultants certified to SS 680:2021, which Enterprise Singapore requires for consultancy support under EDGE Standards activities. The certification is held by our individual consultants, not by ICFC as a company. Our proposal names the certified consultant who will lead your project and includes the SS 680 certification details, quotation and scope that EDGE asks for. You apply on the Business Grants Portal before any work starts or any payment is made. Vendors cannot apply, pay or claim for you, the consultant named in the Letter of Offer must bill the claim invoices, and vendors cannot be changed after approval. Support is subject to Enterprise Singapore's assessment and approval. For our SS 680 certified consultants' roles, certificate numbers, issuing body and expiry dates, or a link to the issuing body's register, please email us through the contact form. Non-grant: A fixed-scope engagement: gap assessment, documentation, implementation coaching, internal audit and management review, and support through the formal audit or assessment. How we work: Practical, proportionate systems that your staff can run after we leave.
Training	Classroom: Public and in-house classroom courses on ISO/IEC 42001: awareness, implementation and internal auditor levels. Online LMS: Self-paced and live-online courses on the ICFC Digital LMS, with progress tracking and certificates of completion. Funding: Funding depends on each course's approval status, shown on the course page in the LMS.

Funding

Listed under EDGE Standards. Enterprise Singapore lists this standard under the EDGE Grant. Check the activity page on the Enterprise Singapore website for the current support level before you apply.

Impartiality

Impartiality comes first. Every engagement begins with a conflict-of-interest check. We keep consulting and auditing roles separate, and our auditors never audit, on behalf of a certification body, an organisation that ICFC has consulted on the same scope within the period set by that body.

Frequently asked questions

Q. Do we need ISO/IEC 42001 if we only use AI tools?

A. If AI affects decisions about customers, staff or safety, an AIMS gives structure even for users of third-party AI.

Q. Does it link to Cyber Trust?
A. Yes. Cyber Trust (2025) includes an AI security domain, and both benefit from shared risk assessment.

Q. Is it eligible for EDGE?
A. Enterprise Singapore lists AI management systems under EDGE Digitalisation Standards. Check the activity page for the support level.

Q. Can it be integrated with ISO/IEC 27001?
A. Yes. Both follow the harmonised ISO structure, so they integrate well.
